Summary

I am a Senior Level FullstackDeveloper. I develop applications from back to front using React, HTML, CSS, Tailwindcss, NodeJS, Typescript, Redux, Zustand, Firebase and Google Cloud. I also have experience having developed projects using LWC for Salesforce. Help implement for a company an IA App using Python, Langchain, AWS and React Native.

- I helped the company Globo, through the consultancy Act, migrate, improve and enable audience segmentations with newer technologies through DMP, enabling faster deliveries in the company's Advertising.

- Developed a system for delivering rapid Covid test results for the company Genezen, enabling the profitability of its core business through the administration of the platform at closed events.

- I developed some DAPPs, on the blockchain for token and NFT transactions.

- Managed international WordPress projects at Yinflow

- Developed LWC Components for C6 in Salesforce

Experienced in consulting companies as well as a solo developer and entrepreneur, I have excellent skills in communication, business and requirements analysis, as well as flexibility and proactivity. I have diverse experience in different contexts and stacks. I am eager to learn.

Experience

Act Digital

Fullstack Developer

Brazil

November 2021 - Present

- My role involves steering their Data Management Platform (DMP) and enhancing advertisement delivery across the Globo network

- Working in this dynamic environment keeps me at the forefront of technological advancements and allows me to apply my diverse skill set to real-world challenges
